EXPERIENCE

Medical Platform

Description: A tech solution for doctors to digitize the process of writing documentation, and provide patients with full digital medical records. Writing and maintaining medical history requires many efforts, and our team was asked to optimize the process.

Technologies: Python, Mobile, MySQL, Trello, Angular.JS.

Role: Software Developer.

Nshama mobile project

Role: Team Lead.

Description: This application provides easy access to the community of homeowners and tenants as part of the property purchase, payment etc.

Technologies: iOS support version 10.3+, Swift 4.0, SwiftlySalesforce, MBProgressHUD, Salesforce Server, Fabric, Puppet, Chef.

Team: 4 developers, 1 Project Manager.

Betting Tips Service

Role: iOS Developer.

Description: It is a platform where users can create tipsters profiles (free or paid) and follow or pay other tipsters.

Technologies: Laravel, Wireframing, REST API, Graphic Design, Web Design, iOS, React Redux, App Design, Design, MySQL, Android.

Team: 6 developers, 1 Quality Assurance Engineer, 1 Project Manager.

Meal Planning Application

Role: Mobile Developer.

Description: A social platform for people who love food and would like to create a positive relationship with their body. This should allow people to draw up a nutrition plan, helping them to organize a rational and profitable diet. In addition, the application should allow users to share their preferences with other members of the community, allowing them to sell/buy any selected item from the proposed dishes. Items can be selected taking recommendations from other users

or from their personal choice.

Technologies: Mobile, React Native, Golang(GO), ReactJS, Odoo, Jenkins.

FlightScope

Role: iOS Developer.

Description: Application that provides players with clear analysis and relevant data about both their strike, ball trajectory and much more.

Technologies: SVN, Objective C, iOS.

Photo Editing App

Role: iOS Developer.

Description: MacOS application for photos management, retouch and uploading to a social network.

Technologies: Objective-C, CoreGraphics, common UI using AppKit, CoreData, other Apple frameworks.
